While the American Empire is fighting hot wars in Afghanistan and Iraq, fighting cold wars in Iran, North Korea, Haiti, Columbia, Syria, Cuba, Venezuela, and almost everywhere in the world, the liberal *Atlantic Monthly* recently featured a special article: "How Should We Fight China?"

How should America fight a fascist China under political tyranny and marketing economy?

How should America not fight China?

Is a new world war between the Beijing's one-party dictatorship and Washington (plus Tokyo)'s imperialism unavoidable? What is the Taiwan problem?

Will China become another superpower (and how long)?

Will China collapse without a fight from outside (and how fast)?

What is the root cause of the Sino-Japanese conflicts?

Will Japan go nuclear after its UN Security Council bid (and how soon)?

How was the largest revolution in human history betrayed so rapidly and ruthlessly?

Why the death rate of coal production in China is 10 times of that in India, 30 times of that in South Africa, and 100 times of that in the US?

How do American Multi-National Corporations (such as Silicon Valley's Yahoo!) collaborate with the repressive regime in China to maintain press censorship?

Why and how the end of Cold War led the world more insecure and dangerous?

and,

How can the American public help China's democratization to end the modern largest slavery?

The key to understanding these questions is the Tiananmen Square 16 years ago.

On the 16th anniversary of the brutal Tiananmen crackdown, we cordially invite our Bay Area communities to join us to review and reflect our contemporary history, to analyze the current situation and to discuss a brighter future not to repeat the past. Some Chinese student activists and political prisoners will also come to share their experience and life change after Tiananmen. From faith-based conservatives to peace-loving liberals, from rule-by-law based businessmen to labor union members, from governmental officials/politicians shaking hands with Beijing's rulers to kindergarteners playing slave labor made toys, we shall not allow the Chinese one-party dictatorship to dominate our life here in the Bay Area and everywhere in the earth.

Other programs include:

Photo Exhibition, May 28th and 29th 12-5PM, Portsmouth Square (the "Heart of Chinatown"), 733 Kearny Street, San Francisco, CA 94108.
